

Summary of the CV

Benjamí Oller-Salvia is an associate professor at IQS - Ramon Llull University. He completed his PhD in Prof. Ernest Giralt's laboratory at IRB Barcelona in 2015 and conducted postdoctoral research with Prof. Jason Chin at the MRC LMB in Cambridge. The research group he leads at IQS since 2019, ChemSynBio, combines chemical and synthetic biology to study transport across the blood-brain barrier and to generate smart biotherapeutics, especially targeting brain diseases.
