

Summary of the CV

Dr. Mohit Kumar is an Assistant Professor at the Faculty of Chemistry, University of Barcelona. He was a La Caixa Junior leader fellow and currently he is a Ramon y Cajal fellow. He completed his doctoral studies on chiral supramolecular nanostructures at Jawaharlal Nehru Centre for Advanced Scientific Research (JNCASR), Bangalore, with Prof. Subi George. In 2015, he moved to the City University of New York, New York, to work with Prof. Rein Ulijn on peptide based functional nanomaterials. His current research interests include active lipid vesicles for nanomedicine, peptide-based supramolecular nanomaterials for diagnostics, sensing etc.
